

customers		
PK	customer_id	SERIAL
	first_name	VARCHAR(25)
	last_name	VARCHAR(25)
	isPremiumMEM	BOOLEAN
	age	SERIAL

customer_id from
customers translates to
tickets to keep track of
how many tickets are
bought

tickets		
PK	ticket_count	INTEGER
FK	customer_id	INTEGER
	child_ticket	NUMERIC(2,2)
	general_ticket	NUMERIC(2,2)
	senior_ticket	NUMERIC(2,2)
	premium_ticket	NUMERIC(2,2)

instead of pulling from
customer, i just pulled
from ticket count to
total how many tickets
are bought for each
movie

concessions		
PK	concession_id	SERIAL
	food_type	VARCHAR(25)
	drink_type	VARCHAR(25)
	qty	INTEGER
FK	customer_id	INTEGER

movies		
PK	movie_id	SERIAL
	movie_name	VARCHAR(50)
	rating	VARCHAR(10)
	length	NUMERIC(3,2)
FK	ticket_count	INTEGER
